Re: DC Coaters

To Whom it may Concern:

As the Sales Manager of a mid-sized stampings supplier to the automotive industry, having subcontractors that can be trusted is an absolute must, and I am pleased to say that my experiences with DC Coaters have been as pleasant and favorable as with any vendor I have come across in my 10-years in the Manufacturing industry.

DC Coaters has shown the willingness and ability to handle the pressure that comes from dealing with the likes of Delphi on a daily basis, and I know that without their involvement with our existing project we may have been doomed for failure. Dennis Cook and his staff have handled every challenge that we have encountered from the initial quote of our project to PPAP and to full production. DC Coaters has found a way to produce quality parts at a reasonable price, and always on-time.

DC Coaters offers Keats Manufacturing Co. value added services that I wish more of our vendors offered: they not only E-Coat the parts to our specifications, but they also pack, warehouse, and drop ship the parts to our customer location. This kind of service is what separates DC Coaters from the rest of our vendors, and it is why I would recommend them to ANY manufacturer that needs E-Coating.

If you would like to speak with me directly regarding DC Coaters and how they have performed for Keats Manufacturing Co., please feel free to do so at your leisure. I can be reached at (847)520-1133.

Sincerely,

Dave King  
Corporate Sales Manager  
Keats Manufacturing Co. / Keats Southwest
