Subject: Letter of Recommendation

Dear Mr. Duane Dulmage,

Although we have yet to lock in on an award to DC Coaters I would recommend their E-coat services to anyone in need of an E-coat supplier that is responsive and competitive. Quote turnaround is exceptional and consistent and in the past year there has certainly been a drive to become more competitive.

The only drawback is location due to freight costs that may drive a competitive price to an uncompetitive range. With a little planning and a possible milk run the future could prove positive as we have performed the necessary audit steps to become an approved supplier. I would also like to mention the plant was very clean, organized, and very well lit and had exceptional work instructions.

So in closing I would recommend DC Coaters to anyone interested in adding an E-coat supplier.

Sincerely,

Orick Tool & Die, Inc.

Adam W. Bowers
