April 10, 2002

To Whom It May Concern:

Aisin USA Mfg., Inc. is a leader in the creation and production of high-quality components and systems for the automotive industry's most demanding companies. DC Coaters has been an in-direct supplier (tier 3) to Aisin USA for several years.

The components that they provide to Aisin USA are shipped to Toyota and CAMI. The quality that they have provided for these parts has been exceptional. There have been no delivery problems. They have even "gone the extra mile" to do whatever it takes to provide parts in emergency situations.

I have every confidence that DC Coaters can provide a high quality service, on time, at a cost-effective rate.

Sincerely,

David C. Andres
